

Stacy Tianci Chen

Wellesley, MA | sc140@wellesley.edu | (763) – 402 – 2656

Portfolio/website link: <https://cicicheb.github.io/>

EDUCATION

Wellesley College, *Data Science Major*

Exp. Grad. May 2028

- Cumulative GPA: 3.91
- Cross-registered at the Massachusetts Institute of Technology and Babson College
- **Relevant Courses:** Microeconomics, Computer Programming, Linear Algebra, Data Structures, Combinatorics and Graph Theory, Probability, Ethics of Technology, Applied Data Analysis and Statistical Inference, Logic, Spatio-Temporal Mechanism Design, Multivariate Statistical Analysis, Causal Inference, Sports Applications of Mathematics, Independent Study on Campaign Finance (CS/ECON)

Oxford University, *Visiting Student in Computer Science*

- Studying computer science at Worcester College of Oxford University

Exp. Sept. 2026 - Dec. 2026

Phillips Exeter Academy, *High School*

Grad. Jun. 2024

- Cumulative GPA: 3.85
- Awards: The Multicultural Leadership Prize (Commencement), The Negley Prize (History), The Blackmar Prize (History), The Nathaniel Gordon Bible Fund Prize (Religion), The Meir Z. Ribalow '66 Theatre Prize (Theatre), Study of History at the Senior Level, All-NEPSAC Athlete (Basketball), 10x Highest Honors

PROFESSIONAL EXPERIENCE

Kellis Lab @ MIT CSAIL – *Undergraduate Researcher*

Sept. 2025 - Present

- Effectively registered half slices of mice brain tissue samples using statistical techniques.
- Improved methods of data visualization, annotation, and harmonization using Python, R, Linux, and bash/slurm scheduling to study early development of Alzheimer's disease.

UNC-Greensboro GraLNA REU Program – *Undergraduate Researcher*

May 2025 – Present

- Applied graph neural networks and machine learning techniques on brain fMRI data.
- Processed and analyzed neuroimaging datasets, including functional connectivity matrices and edge time series, to extract meaningful features and improve spatio-temporal representations of brain networks.
- **Co-authored a published and presented paper** on a novel approach to Alzheimer's disease classification.

Wellesley Communications & Public Affairs Office – *Assistant Videographer*

Sept. 2025 – Present

- Edited, filmed, and analyzed content highlighting campus life, events, and people for social media.
- Produced welcome message, interviews, and documentary-style videos found on all Wellesley accounts.

MIT Healthcare Innovation Group – *Undergraduate Researcher*

Sept. 2025 – Dec. 2025

- Analyzed data sets to identify critical nodes and edges in the Boston-area healthcare startup ecosystem.
- Modeled patterns and connections between factors in the cluster using statistical tools and methods.

PUBLICATIONS AND PRESENTATIONS

Chen, S., Xu, A., and Kim, M. (2026) "Learning Time-Varying Co-Fluctuation Patterns from fMRI for Neurological Disease Diagnosis." *IEEE Xplore*.

Chen, S. "Learning Time-Varying Co-Fluctuation Patterns from fMRI for Neurological Disease Diagnosis." *Poster, International Symposium on Biomedical Imaging, London, April 2026*.

Chen, S. "Graph Neural Networks: The Future of Neurodegenerative Disease Detection?" *Oral Presentation, Tanner Conference, Wellesley, October 2025*.

EXTRACURRICULAR ACTIVITIES

Wellesley College DIH Basketball – *Member*

Sep. 2024 – Present

Asian Students Union – *Vice President*

Sep. 2024 – Present

SKILLS

Programs and Technology: Python, PyTorch, Java, HTML, R, SQL, Stata, Linux, Microsoft Word, Excel, Canva, ProCreate, Adobe Lightroom, Adobe Premiere Pro
